

PU-UNIVERSAL CLEANER 500

- Fresh PU foam removed effortlessly
- CFC-free

500 ml

PROFI-CLEAN® – This special cleaner fluid is used for mainly two purposes:

1) Cleaning applicator guns.

2) Removing of excess foam during the application of the foam and cleaning of the valves of the PU foam aerosol. The cleaner is also suitable to dissolve paint marks, grease, oil, wax and adhesives. The cleaner can's standard-thread adapter fits all commonly used guns.

Cured foam can be removed by mechanical means only.

PROFI-CLEAN® iki ana nedenle üretilmiştir;

1) Kutuların valflerinin ve kullanım sırasında karşılaşılabilen istenmeyen köpüğün temizlenmesi.

2) Kullanım sonrası tabancanın temizlenmesi. PROFI-CLEAN® sertleşmemiş köpüğün temizlenmesi için geliştirilmiş bir ürün olup, boya lekeleri, yağ, balmumu, yapıştırıcılar vb. temizlenmesinde de kullanılabilir.

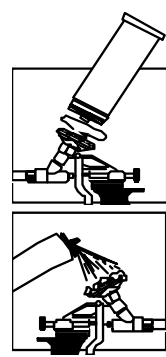

Sertleşmiş köpük yalnızca mekanik olarak temizlenebilir.

PROFI-CLEAN® – специальный растворитель произведённая для двух основных целей:

1) Для очистки остатков незатвердевшей пены после применения и для чистки клапана баллона.

2) Для чистки пистолета аппликатора. А также, PROFI-CLEAN® можно использовать для очистки пятен от краски, масляных изделий, воска и прилипающих веществ. Стандартный адаптер баллона подходит ко всем распространенным видам пистолетов аппликаторов.

Затвердевшая пена удаляется только механическим путём.

TECHNICAL DATA SHEET

PROFI-CLEAN® – PU-UNIVERSAL CLEANER 500

Page 1
Issued: 03/01/2003
Revision No: 2

- Product Description** **PROFI-CLEAN®** PU-Universal Cleaner has been designed for cleaning applicator guns. It contains an environmentally safe propellant, which complies with the latest EU-regulations banning all CFC-propellants. Development and manufacture of our products is subject to our approved quality assurance system according to ISO 9001/EN 29001.
- Typicals Applications** **PROFI-CLEAN®** PU-Universal Cleaner for applicator guns removes fresh, uncured PU foam. The can is fitted with an adapter ring which screws on to the gun. For use without the gun, the can is fitted with a spray head. This dual function meets the requirements of the professional user.
- Properties** **PROFI-CLEAN®** PU-Universal Cleaner for applicator guns removes and dissolves fresh, uncured PU-foam. The cleaner can's standard-thread adapter fits all commonly used guns. Thorough cleaning of the internal gun mechanism is enhanced by the pressure the propellant exerts. The active ingredients of **PROFI-CLEAN®** PU-Universal Cleaner are consistent with the materials used in the manufacture of PU foam applicator guns. Frequent use of **PROFI-CLEAN®** PU-Universal Cleaner maintains them in good working order.
- Important information for the general removal of PU foams:** Because **PROFI-CLEAN®** PU-Universal Cleaner for applicator guns contains acetone, it may dissolve or discolour surfaces such as plastics, lacquers, coatings, paints, textiles etc.. Therefore, delicate fabrics and surfaces must always be tested in a concealed area first.
- Instructions for Use:** A suitable waste container and a cloth should be at hand for disposal of waste fluids and wiping away cleaner fluid and dissolved PU foam residues. Remove the PU foam can from the gun. Use the spray head on the **PROFI-CLEAN®** PU-Universal can to clean the adapter part and the outer body of the gun. Remove the red spray head from the **PROFI-CLEAN®** PU-Universal Cleaner can and carefully screw the can on to the gun. For safety reasons, the gun trigger should be pulled whilst screwing on the cleaner can. This will depressurise the gun. Pull the trigger to purge the gun. As soon as cleaning fluid appears at the tip of the gun, release the trigger and allow the cleaner to work inside the gun for approximately two minutes, then flush out the gun into a waste container. Repeat this procedure until only clear cleaner fluid comes from the gun. Once the cleaning procedure is completed, unscrew the **PROFI-CLEAN®** PU-Universal Cleaner can from the gun.
- Important:** Only fresh foam can be removed with **PROFI-CLEAN®** PU-Universal Cleaner. Cured foam can only be removed mechanically.
- Note:** Sharp instruments must never be used on PU foam applicator guns as this may damage the protective coating of the gun.

Safety regulations**Safety advice:** PROFI-CLEAN® PU-Universal Cleaner is highly flammable!

Keep container in a well ventilated place. In use, may form highly flammable vapour-air mixture. Keep away from sources of ignition - No smoking. Do not breathe vapour and spray. Take precautionary measures against static discharges. Pressurised container; protect from sunlight and do not expose to temperatures exceeding 50 °C. Do not pierce or burn, even after use. Do not spray on a naked flame or any incandescent material.

Keep out of reach of children! Use only in well ventilated areas! Vapours gathering in insufficiently ventilated areas may cause flammable and noxious concentrations.

Delivery Form: Tinplate container; contents 500 ml, with adapter ring and attachable spray head.

Disposal: Completely emptied PROFI-CLEAN® PU-Universal Cleaner cans are suitable for recycling subject to individual national rules and regulations. Store cans upright. We reserve the right to make physical and chemical changes to our products from time to time as a result of technical development and research.

The data shown can only represent a general guideline. Depending upon particular application circumstances and techniques beyond the control of the manufacturer, these guidelines can not entitle to any claim. Sufficient pre-testing is recommended. More detailed information regarding industrial safety is included in the Material Safety Data Sheet (MSDS).
